# Gamification

JET (Jogo Engagement Tool) can build tailor made solutions to support your acquisition and retention strategies.

**Business Goals**  
Survey made with the client to define what results are to be achieved by the gamification strategy.

**Target Behaviours**  
Defining the behaviours that people need to perform for the business objectives to be achieved.

## Audience

Identifying the demographic profiles of people who can contribute to the achievement of the business objectives.

## Gamification Mechanics

Selection and integration of gamification elements to motivate each demographic profile to emit the desired behaviours.

## Motivational Analysis

Understanding what the intrinsic and extrinsic factors are, that motivate the target audience of the gamification strategy.

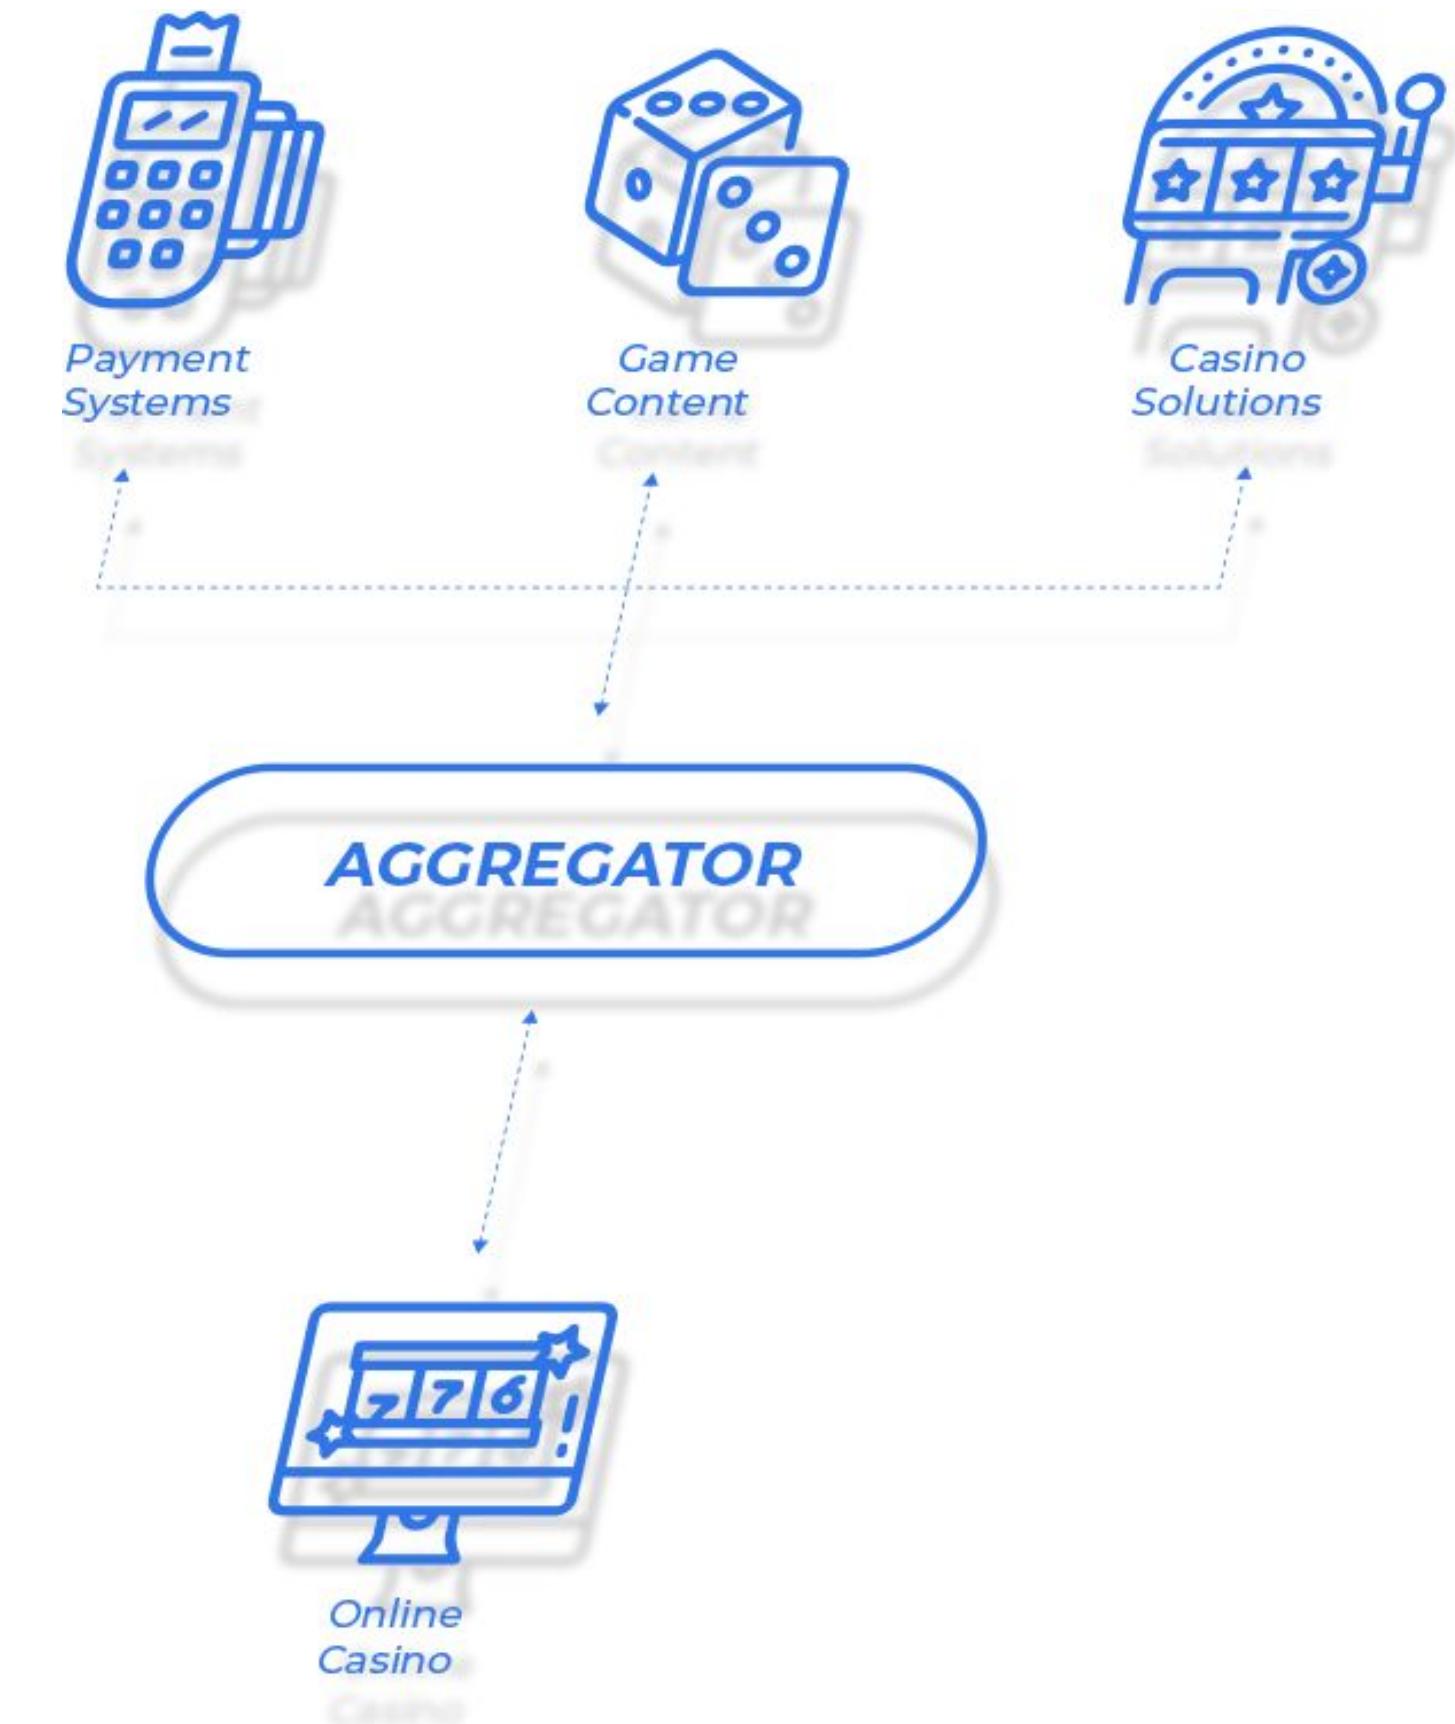

## Aggregation Platform - JAPGO

ANY OPERATOR, ANY PLATFORM,  
ANY CONTENT, ANY MARKET.

The Jogo Global Aggregation Platform (JAPGO) delivers a complete casino and gaming solution providing operators with the ability to rapidly add all of the leading game providers and content verticals to their online iGaming portfolio.

JAPGO is a flexible and highly scalable platform that can be integrated seamlessly into any 3rd party platform, operator wallet and front-end.

Popular casino games come together in one Game Aggregator hub. With JAPGO it is easy and simple to add this massive portfolio to any gaming website through just one API integration.
